

LEADING THE WAY IN

PROCESS, PACKAGING & IN-PLANT ENGINEERING SERVICES FOR THE FOOD & BEVERAGE MARKET

InLine
ENGINEERS

A GRAY COMPANY

AT THE CORE

Our Mission: To provide unparalleled engineering and project management services for our food and beverage manufacturing partners. Using our breadth of experience and expertise, we develop and implement innovative and robust solutions. We work alongside our customers' engineering, production and development teams providing an optimal return on investment.

Gregg Coleman
President
InLine Engineers
gcoleman@inlineengineers.com

For more than 20 years, InLine Engineers has been providing engineering and project management services for the development and execution of capital projects relating to processing, packaging and facility improvements for the food and beverage industry. InLine Engineers is headquartered in Louisville, Kentucky with additional full-service offices in Atlanta and Cincinnati.

The team of engineering and project management professionals, many with Professional Engineer (PE) and/or Project Management Professional (PMP) certification, is committed to helping our food and beverage manufacturing customers meet their objectives.

With world class experience ranging from baking to dairy and beverages, InLine delivers production and food technology needs including bulk handling, processing, packaging, sanitary design with FDA food safety compliance, as well as turn-key equipment solutions.

Gary Sisler
Director
InLine Engineers

1

We put safety and quality of life first.

2

We are customer and relationship driven.

3

We treat others the way we want to be treated.

INLINE SERVICES

Research and Development/ Feasibility Studies

Preliminary Engineering

- Scope of Work Summary
- Process Flow Diagrams
- Layouts
- Equipment List
- Process/ Packaging Utility Requirements
- Scale of Magnitude Capital Estimate
- Level 1 Schedule- Major Milestones

Detailed Engineering

- Mass Flow balance
- Define Recipe needs
- Equipment specifications
- Equipment Vendor Selection assistance
- Process Piping Design
- 30-60-90% Design Reviews
- Value Engineering
- Detailed P&IDs and BOMs
- Final Line Layouts and Drawing Packages
- Installation Bid Packages
- Installation Contractor Qualification/ Selection

- Procurement assistance
- FAT- develop criteria and participate
- Finalize Processing and Packaging budget
- Detailed equipment installation schedule
- Overall Line Integration

Line Installation Oversight

- Ensure compliance to specifications
- Handle Contractor RFIs

Start up and Commissioning

- ICO/ ACO Check outs
- SAT- develop criteria and participate
- Line validation
- Manage training plan

Project Close Out

- Editing As-Built Drawings
- Develop SOPs

Other Services

- Process Evaluation and Improvement
- Third Party Peer Review
- Multi-Year Capital Planning
- Food Safety Certification Assistance

UNIT OPERATIONS

- Bulk ingredient handling
- Handling combustible dust
- Mixing
- Blending
- CIP
- Thermal processing
- Pasteurization
- Grinding, forming, linking
- Trimming, skinning, slicing
- Cooking, various
- Baking
- Frying
- Cooling, Freezing
- Aseptic filling
- Accumulation
- Bottling
- Form, fill, seal
- Pouch filling
- Bagging, bog in box
- Cartoning
- Case packing
- Check weighing, metal detection
- Palletizing
- Hygienic zoning
- Liquid storage and distribution
- Custom sanitary skids, design and build
